

FORM FOR LEARNING OUTCOMES FOR DEGREE PROJCT AT MASTER PROGRAMME OF SCIENCE AND ENGINEERING

The Subject reader will go through this form together with the student twice: Before the thesis project starts and discuss based on the thesis project plan, and before the presentation and discuss based on the report. Before starting the thesis project, the student signs to show that they have understood the learning outcomes in light of the proposed project. Before the presentation, the subject reader signs to show that they ensure the learning outcomes are fulfilled. The Form for Learning Outcomes follows the Application Form during the handling of the thesis.

On completion of the course, the student should be able to:	Before start of project	Before presentation of project
• identify and formulate technical problems		
• independently plan and carry out an assignment within given time frames by employing scientific and engineering approaches and methodologies		
• search, compile and use relevant literature		
• demonstrate advanced knowledge in a specific sub-area within the field of the program,		
• present and discuss the results in a clear and correct language both orally and in writing to different target groups		
• provide constructive criticism on others' reports
